cooling/
dehumidifying/
fanning

- TCL PORTABLE AIRCON** is your ideal solution if
- You need cold air when central air-conditioning is not available
 - Traditional air conditioning is not sufficient
 - Wall hacking or structural work is not possible
 - You need to cool a small area only
 - You need a temporary or mobile cooling solution

TCL PORTABLE AIRCON models are popular worldwide for their reliability, high efficiency and affordability. The wide range of products can meet the requirement of every room area size. Research achievements and constant technology breakthrough not only make TCL products ever more user-friendly, but also more eco-friendly. In TCL we believe in green living and sustainable development, a cornerstone that makes TCL Portable Air Conditioner one of the most trustworthy brands locally and internationally.

TCL products are engineered for Asian markets with Italian technology led by portable cooling pioneer Delonghi Italy, maker of the world's first portable air conditioner. The TCL-Delonghi manufacture plant remains one of the largest in the world for portable air conditioners and dehumidifiers to date.
