

TOSHIBA

YouMe 2.0

**The Efficient,
Climate-Friendly
and Smart Inverter
Multi-Split System.**

Available in System 2 to 5

Toshiba Air-Conditioning Singapore

Toshiba was the world's first company to incorporate inverter technology into residential air-conditioning systems, effectively reducing energy loss in air-conditioners.

In 1999, Toshiba and Carrier formed a global joint venture called Toshiba Carrier Corporation. Through this alliance, Toshiba provides technological and manufacturing expertise for inverter-based products, while Carrier leverages its global reach to distribute them outside of Japan.

Toshiba Carrier continues to deliver innovative solutions that contribute towards a sustainable future for generations to come. Committed to people, committed to the future; we make and do things that lead to a better world.

What to look out for in an air-conditioner

1

Energy efficiency

The NEA energy label is used to display the energy efficiency of household appliances.

How to read

2

Climate-friendliness

Refrigerants can contribute to global warming when released into the atmosphere, and this is measured by its Global Warming Potential (GWP). In 2020, NEA rolled out a new label that enables consumers to identify air-conditioners that use climate-friendly refrigerants.

3

Right capacity

BTU (British Thermal Unit)/hr measures the cooling capacity of an air-conditioner. This is an approximate guide that is dependent on the actual heat load of the room to be cooled. For a more accurate recommendation, please check with our authorised dealers and installers.

Room Type	Area in Sq Ft. (Sqm)	kBTU/hr Required
Small Room	100-150 (9-14)	9
Master Bedroom	150-250 (14-23)	12
Living Room/Halls	300-400 (28-37)	18 - 24 onwards

4

Suitable system

No. of rooms to cool	System Required	No. of indoor units (blower)	No. of outdoor units (compressor)
2	System 2	2	1
3	System 3	3	1
4	System 4	4	1
5	System 5	5	1

5

Easy maintainance

Enjoy clean air between maintenance intervals with advanced technology like our YouMe's Magic Coil* and Self-Cleaning feature*. Regular maintenance intervals of 6 months is recommended to upkeep the condition and performance of your air-conditioner. For queries on air-conditioner servicing and maintenance, please contact your installer or any of our authorised dealers.

*Read more on page 11.

The Climate-Friendly Choice

Planet-Friendly Refrigerant

With up to 72% fewer CO2 emissions than its R410A counterpart, the R32 is a more climate-friendly refrigerant with lower global warming potential (GWP) and zero ozone depletion (ODP). Toshiba YouMe is proud to be the first 5-Tick Inverter Multi-split R32 air-conditioner in Singapore.

Quick Cooling

13%
bigger fans than
standard air-conditioners

Enjoy quicker and quieter cooling with YouMe’s redesigned fan in its indoor unit. Now 13% bigger with special skewed blades, this increases airflow while reducing the sound level by up to 8% versus conventional blades.

30%
larger heat exchanger
surface area

Paired with a 30% larger heat exchanger thanks to an increased copper tube count in the coil, cold air can now enter your room more efficiently.

Once the set point is reached, lower fan speeds quietly maintain your desired temperature while reducing energy consumption.

Energy Saving

Cool your rooms with less time and energy thanks to Toshiba’s inverter technology. Now with Toshiba’s DC Hybrid Inverter System, the Pulse Amplitude Modulation (PAM) sets the compressor at maximum power in order to reduce the time to reach the set point temperature. Once the set point is reached, the Pulse Width Modulation (PWM) lowers the variable speed of the compressor to precisely maintain room temperature, thereby using less energy.

Dark Mode

For better sleep, adjust the brightness of your YouMe's halo light, or switch it off completely.

3 LED Light Levels

1 Press and hold **FAN** for three seconds until **d0, d1, d2 or d3** is shown

2 Press **▲** or **▼** on **TEMP** to adjust brightness

Smart Control

Take control from the comfort of wherever you are with the new Toshiba Home AC Control app.

Grouping Control Function

Group and control multiple units at a time with the app's Smart Air-Conditioner Grouping Control.

Smart Home Assistant Compatible

Set Up the App in 3 Simple Steps

1 Download the App from the App Store.

Download on the App Store

Available on the Google Play

Toshiba Home AC Control

2 Register and log in.

3 Add the air-conditioner wireless adapter under:
Home page > Add air-conditioner
OR
Settings > Add AC (Adapter)

For more information on set-up and usage, please refer to the user manual that can be found with your YouMe or in the app itself.

Enhanced Indoor
Air Quality

PM2.5
Purification

Now indoor air quality (IAQ) is more important than ever. Toshiba Ultra Pure filter creates clean and healthy living spaces at home by capturing up to 94% of PM 2.5 (atmospheric particulate matters with diameters of less than 2.5 micrometers).

Easy-Care

Between maintenance intervals, YouMe’s feature make things easy for you so that that you can enjoy healthy air all year round.

Magic Coil

Not only does YouMe cool more efficiently, but it also keeps the air you breathe fresh and clean. That is why along with an active carbon filter, YouMe uses a special aqua-coated aluminum fin heat exchanger, Magic Coil, that helps keep dirt and debris from building up on your coils.

Self-cleaning FCU

As residual moisture is often a breeding ground for mould, the feature allows the blower inside the unit to continue running at a low speed for up to 20 minutes after the FCU is switched off, effectively drying the coils and keeping your air fresh and clean.

Normal Operation

Moisture stays trapped inside during operation.

Self-Cleaning Function

20 minutes of fan operation after shut down dries the moist air and helps reduce mould formation.

Easy Cleaning

YouMe makes regular light cleaning effortless for any home owner. With a new, smooth grille and easy to remove vertical louvre, your YouMe can be kept dust-free with just 3 simple steps.

- 1 Wipe the new, smooth grille with a damp sponge
- 2 Remove and rinse the pre-filter
- 3 Remove the vertical louvre to clean the cross-flow fan
